### **Planned demolition works completed safely at Aberthaw**

Residents may have heard a loud noise earlier today caused by a planned, controlled demolition at the former Aberthaw Power Station site.

The works were carried out safely and exactly as planned by specialist contractors, following months of engineering preparation and in line with agreed safety and environmental controls. There was no risk to the public, and the demolition was completed without incident.

This activity forms part of the wider demolition and site preparation programme at Aberthaw. No further demolition works are planned today.
