

Friday 5th June 2026

Demolition of Aberthaw Power Station

Dear Resident,

Since our last update in February 2026, works at the Aberthaw Power Station site have continued to progress safely and as planned.

We would like to inform residents that a controlled explosive demolition of the chimney stack is currently scheduled to take place on the morning of Friday 12 June 2026, subject to suitable weather and site conditions.

The demolition will be carried out by specialist demolition and explosive engineers using a carefully planned method designed to ensure safety, precision, and minimal disruption to the local community.

The safety of residents, members of the public, and our workforce remains our highest priority. Extensive planning, engineering assessments, and risk evaluations have been completed in coordination with emergency services, local authorities, and specialist contractors.

To ensure the area remains safe during the demolition:

- Limpert Bay Road and sections of the public coastal path surrounding the site will be temporarily closed for a short period.
- Police officers and trained demolition personnel will be positioned at access points and diversion routes.
- Access will be restored as soon as the area has been confirmed safe.

We recognise that the demolition may cause concern for nearby residents. The event will produce a short-duration noise, similar in nature to a loud thunderclap, as the structure is brought down. Any noise associated with the demolition itself will be brief, lasting only a few seconds.

To minimise impacts:

- Dust suppression measures will be in operation before, during, and after the demolition.
- Noise, dust, and vibration monitoring equipment will operate throughout the works.
- Environmental monitoring will continue around the site boundary during the activity.

Confirmation of the demolition time, along with updates regarding temporary closures and reopening of public access routes, will be published on the CCR Energy website and social media channels.

Should you have any questions, concerns, or feedback regarding the works, please contact us at:

Aberthaw_Residents@erith.com or visit the CCR Energy website: www.ccrenergy.com

Thank you for your continued patience and cooperation while these works are completed.

This notice concerns demolition activity at Aberthaw Power Station.

Sincerely,

Erith Contractors
